STANFORD UNIVERSITY
STANFORD, CALIFORNIA 94305

OFFICE OF THE DEAN

October 20, 1966

Dr. T. L. K. Smull, Director
Office of Grants & Research Contracts
National Aeronautics & Space Administration
Washington, D.C. 20546

Dear Dr. Smull:

I have your letter of October 18 concerning the forthcoming visit on October 29. I will distribute copies to those persons participating.

Our plan is to meet for a discussion in the Conference Room of the McCullough Building. This is Room 240 on the second floor. On Saturday you can park directly in front of the building, regardless of what the signs say as to restrictions during the week. I am enclosing a map which shows the location.

The attendance list for Stanford now appears to be as follows:

Dr. Hubert Heffner, Associate Provost and Dean for Research

Joseph M. Pettit, Dean, School of Engineering

William R. Rambo, Associate Dean for Research, School of Engineering

Dr. Nicholas Hoff, Executive Head, Department of Aeronautics and Astronautics

✓ Dr. Joshua Lederberg, Executive Head, Department of Genetics

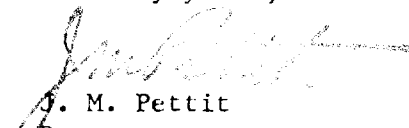

Dr. John G. Linvill, Executive Head, Department of Electrical Engineering

Dr. Frederick E. Terman, Provost Emeritus

Luncheon arrangements have been made, but I need not trouble you with the details at this writing.

This looks like a very valuable meeting. I am arranging to return from Mexico City in time to be with you.

Cordially yours,

J. M. Pettit
Dean
